

Message from the Executive Director Illinois LSAMP

The Illinois Louis Stokes Alliance for Minority Participation (Illinois LSAMP) accepted the challenge to improve the flow of underrepresented students to science, technology, engineering and technology (STEM) careers by preparing them to perform at the highest levels of professionalism. The Bridge to the Doctorate (BD) is a natural outflow from the impressive national pool of more than 25,000 STEM students produced yearly. These excellent students have undergone vigorous training to obtain bachelors degrees in LSAMP institutions across the United States.

In order to continue its competitive edge in STEM it was necessary that the United States enlist the participation of all of its citizens. The unique vision of the National Science Foundation (NSF) in developing and offering the BD program to the public has greatly enhanced the likelihood that in the foreseeable future there will be a significant pool of well prepared underrepresented scientists and engineers ready to take essential STEM positions in industry, research and in academia. The combined efforts of the NSF and higher education institutions have been instrumental in implementing the BD program.

Dr. Marian Wilson Comer

The Illinois LSAMP has developed successful BD students at two institutions. Twenty-four students have matriculated at Southern Illinois University at Carbondale and 24 are at the University of Illinois at Chicago. The success of these programs has been accomplished through:

- * Ensuring access to research involvement by pairing students with appropriate mentors:
- Establishing cluster groups of students to function as cohorts for easy exchange of ideas and information among fellow students;
- Providing funds to free students from the necessity of working in order that they
 may have more time to concentrate on studies;
- * Developing activities for students to become aware of internal and external services and resources, and to improve leadership ability; and,
- * Exposing students to professional activities such as proposal writing, conference presentations and networking in order to motivate them to continue striving for excellence in their personal, academic and professional lives for years to come.

The expansion of the BD program to include the participation of additional institutions demonstrates the commitment of both the NSF and the academic community to provide solid foundations for underrepresented students in STEM that will serve the nation, the world, and the future. Illinois LSAMP institutions, faculty and students are proud to be a part of this grand program.

Marian Wilson Comer, PhD Executive Director Illinois LSAMP

Greetings!

The University of Illinois at Chicago has been an active partner in the Louis Stokes Alliance since its inception. As such, we are honored to be the current Illinois LSAMP Bridge to the Doctorate program site.

Working to achieve the program's goal of increasing the number of underserved and underrepresented students who obtain a PhD in Science, Technology, Engineering, and Mathematics (STEM) disciplines is a collaborative effort. At UIC, faculty and staff from the Colleges of Medicine, Engineering, Liberal Arts & Sciences, and Pharmacy, the School of Public Health, and Graduate College are engaged in this important endeavor. They work closely to provide students with the academic preparation, mentoring, research experiences, and professional development opportunities necessary to prepare them for STEM careers in academia and in industry.

Dr. William Walden

Supporting UIC in our efforts to encourage and educate the next generation of researchers are colleagues from other LSAMP colleges and universities in Illinois and across the United States. These intra- and inter-campus relationships create wonderful opportunities for the scientific and academic communities, but especially for students – ones we hope will inspire them to think and function creatively and pursue their interests and ambitions.

The following brochure has been assembled in part to provide prospective students with details about Bridge to the Doctorate at UIC. To them I say – we welcome your exploration of and application to our doctoral programs and the BD program at UIC. Best wishes to you, now and in the future.

Sincerely,

William E. Walden, PhD
Director, Bridge to the Doctorate at UIC
Special Assistant to the Provost for Diversity and
Professor, Microbiology and Immunology

The Directorate for Education and Human Resources (EHR) through the Division of Human Resource Development (HRD) announced the Louis Stokes Alliances for Minority Participation (LSAMP) supplementary activity, Bridge to the Doctorate, beginning February 2003. The goal of these supplements is to fund an initial graduate degree bridge activity to Phase III LSAMP Alliance institutions. Approximately 25,000 baccalaureate degree recipients are produced annually at LSAMP institutions.

The Bridge to the Doctorate activity includes effective strategies for recruiting, retaining, educating and graduating student participants. A plan for formally connecting a significant number of newly minted LSAMP master's degree graduates to doctoral degree programs is in place at participating institutions. In addition, participating students will be tracked into doctoral degree programs and the workforce, including the professoriate. Participating institutions are providing highly valued activities such as mentoring of students, opportunities for travel, participation in professional meetings and hosting seminars and workshop.

Since 1993 Chicago State University has served as lead institution for ILSAMP which includes Depaul University, Governors State University, Illinois Institute of Technology, Illinois State University, Northeastern Illinois University, Southern IllinoisUniversity at Carbondale, Southern Illinois University at Edwardsville, the University of Illinois at Chicago, nine community colleges and Argonne National Laboratory.

The establishment of the NSF Bridge to the Doctorate Program (BDP) provides incentive and access to graduate study for LSAMP graduates. The Illinois LSAMP program has been the recipient of four BD cohorts. Two of these programs were located at Southern Illinois University at Carbondale and two are currently located at the University of Illinois at Chicago (UIC).

Illinois LSAMP Bridge to the Doctorate Overview

ILSAMP Bridge to the Doctorate Fellows Cohort 2, 3, and 4 at Illinois LSAMP Regional Conference

Headquarters at Chicago State University

Through the Bridge to the Doctorate, Fellows take part in various academic support and professional development activities facilitated by NSF, the Illinois LSAMP, UIC, and their respective academic Departments. These activities are designed to stimulate continued development of research and academic skills and to provide a venue for cultivating creativity in the development and exchange of ideas.

David Weed, BD Fellow: Illinois LSAMP Regional Conference

BD at UIC Support Highlights

- \$30,000 stipend for the first 2 years of doctoral study
 - Full tuition and fee support
- Travel to regional, and national, and international research conferences
