

ALLIANCE FOR MINORITY PARTICIPATION
SUMMER SCIENCE INSTITUTE
COMMUNITY COLLEGE TRANSFER BRIDGE PROGRAM

CHICAGO STATE UNIVERSITY
AMP-SSI-CCT
JUNE 23 -AUGUST 1, 1997

Participate in the 1997 AMP-SSI-CCT Program, enhance your learning skills. Allow yourself to experience community college-four year university transition, meet new friends, interact with faculty, enjoy social activities and field trips while you earn a \$1500 stipend.

AMP-SSI-CCT is a transition program with two components. One component, a six week transition summer science program with focus on Biology, Physics, Chemistry and Mathematics/Computer Sciences, is designed to enhance reading, writing, computer and mathematical skills in the context of scientific research. The other component involves students who will be transferring into Chicago State University the following year. These students will develop a general understanding of the nature of scientific inquiry and research before they participate in the transfer summer science program.

Areas of research will include Biological Sciences (Genetics, Microbiology, Exercise Physiology and Environmental Biology), Chemistry, Math/Computer Science and Physics.

AMP-SSI-CCT provides excellent opportunities for African Americans, Hispanic/ Chicano Americans and Native Americans to experience the excitement of "hands-on" science. It allows the participant to enhance awareness of majors and careers in science, and get a jump start at successfully completing the transition process from community colleges to four year universities.

This program is for students who plan to attend Chicago State University and enroll in the Sciences in the fall semester of 1997.

The application deadline is April 14, 1997. Apply Early!

For more information, contact Arlicia Corley, AMP-SSI Office, Room 101, Williams Science Center, Chicago State University, 9501 South King Drive, Chicago, Illinois 60628, Telephone (773) 995-2987.
